

Chaparral

The multiple roof angles of our Chaparral announce more design delights inside. The front door leads from the covered porch into a living room that merges seamlessly into an expansive family room and dining area. From the living room a unique angular hall provides entrance to the bedroom areas. A highlight is the master suite, entered through double doors to reveal a cathedral ceiling and integrated master bath with a whirlpool tub surrounded by windows. Throughout the home, an abundance of windows floods the interior with light. The large double garage offers an opportunity for a workshop as well as auto storage, while an expansive rear deck is ideal for outdoor entertaining.

Angles bring informal elegance.
