

# Homesteader

*Are your log home dreams fueled by memories of ski trips or vacations spent in log lodges? Our Homesteader captures those feelings with its traditional design. A shed porch greets visitors while inside a central stairway separates a large living room and dining room, covered by open beamed ceilings. A den off the living area makes an excellent office. Upstairs, three spacious bedrooms enjoy the country atmosphere created by the dormers and gambrel roof.*

*A gambrel roof adds a country touch.*
